

Argacem Coloured

Breathable and water-repellent coloured finishing skim coat in paste (such as **Argacem Coloured**), made out of by hydraulic binders, mineral charges and natural pigments, designed to finish plasters applied outdoor. In particular it is ideal to finish thermal and dehumidifying plasters of *Diathonite* line, because it disposes of humidity absorbed and released by *Diathonite* and prevents the absorption of meteoric water by the masonry. Minimum required characteristics: Water vapour permeability coefficient $\mu=7$; Resistance to atmospheric salinity (coast-side environments) – excellent; Weathering Test 1680 hours (> 10 years).
