

Argacem HP

Powder finishing skimming plaster (such as **Argacem HP**) composed of lime and other natural raw materials such as hydrated lime, natural fillers and very pure mineral aggregates of calcareous origin. It is characterised by high workability during spreading and trowelling and by a marked anti-bacterial capacity. It is ideal for application even on thick surfaces and guarantees excellent coverage of the substrate, giving a final appearance that is pleasing both to the eye and to the touch. Minimum required characteristics: Permeability to water vapour $\mu \leq 15$; Compressive strength 3,50 N/mm² | 507.63 lb/in²; Reaction to fire – Class A1; Minimum thickness application 3 mm.
