

Epofill Kit

Two-component, water-based epoxy filler (such as **Epofill Kit**) to be used for repairing industrial floors and all concrete surfaces, even in very thick layers thanks to the material's filling capacity. It fills and repairs cracks and fissures typical of industrial floors, drying very quickly and creating a surface that can be driven on, even by heavy vehicles. Minimum required characteristics: Puncture resistance 10 kg = 98,1 N.
