

Pool Protector

Single-component, highly UV-resistant, satin-finish acrylic coating (such as **Pool Protector**), suitable for painting swimming pools and concrete pools due to its excellent resistance to chlorinated water and abrasion. Flexible and good hiding power, it produces a smooth, seamless finish. Available in coloured or transparent versions. It is used in combination with a waterproofing agent (such as **WATstop**). The transparent version is designed for coating and protecting the *Decork / Decorkrete* cork-based finish in swimming pool systems. Minimum required characteristics: Water Vapour Permeability Coefficient $\mu = 4630$;
