

Diaseal Strong

Single-component, polyurethane sealant (such as **Diaseal Strong**) with excellent thixotropy. It polymerises on contact with atmospheric moisture, forming a sealant for joints, precast panels, bricks, precast blocks and joints between concrete slabs. It is also designed to seal swimming pools and water tanks even with dissolved chemicals, and drinking water tanks. It adapts to substrate movement and has excellent adhesion to most building materials. Ideal for applications on glass, polycarbonate, granite and marble, metal, aluminium windows and panels, irrigation channels and also for immersion applications. Minimum requirements: Adhesion to concrete > 2.0 N/mm².
